

EARTHQUAKE

Indoors

- If you are indoors, drop to the floor.
- Take cover under a sturdy desk, table or other furniture. Hold onto it and be prepared to move with it. Hold the position until the ground stops shaking and it is safe to move.
- Stay clear of windows, fireplaces, wood stoves, and heavy furniture or appliances.
- Stay inside. If you are in a crowded area, take cover and stay where you are; encourage others to do likewise.

Outdoors

- If you are outside, get into the open, away from buildings and power lines.
- Be watchful for falling glass and building debris.

Traveling

- If you are driving, find a safe place to stop and stay inside your car.
- Stay away from bridges, overpasses and tunnels.
- Move your car as far out of the normal traffic pattern as possible.
- If possible, avoid stopping under trees, light posts, power lines, or signs.
